

PRODUCT SPOTLIGHT:

360™ Spray Nozzle Kits

Introducing the 360™ Spray Nozzle & Grommet Kit

The 360™ Spray Nozzle and Grommet Kit is designed to retrofit in Evapco coil units utilizing 1" threaded nozzles on 3" or larger PVC branch spray systems. Customers no longer need to replace the branches on the spray system to re-gain capacity. Now with just a few simple steps: remove, plug, and replace, they can go from replacing the threaded back-to-back nozzle spray system on competitor's units to a more efficient, easier to maintain 360™ Nozzle and Grommet spray distribution system that pops in/pop-out. These nozzles are also available for all BAC coil products.

Competitor's
Threaded
Nozzle

BAC 360™
Spray Nozzles
and Grommet

Advantages of the 360™ Nozzle & Grommet Kit

- ✓ Easy to replace and maintain
- ✓ Umbrella spray pattern requires no repositioning
- ✓ Requires half as many nozzles as the back-to-back configuration
- ✓ No threads means no stripping
- ✓ Non-clog design
- ✓ Simplifies maintenance through reduced labor
- ✓ Can update spray system without replacing the spray branches
- ✓ For Evapco and BAC coil products
